

## Case Studies

To celebrate the 10th anniversary of his luxury product design studio, Atelier XJC, the Swiss-based watch and jewellery designer Xavier Perrenoud has created a series of experimental jewellery prototypes. Enlisting the talents of Brice Compagnon, the former casting director for Oliviero Toscani and Benetton, to help him find dramatic-looking characters to model his abstract, ornamental pieces, he also teamed up with photographers Milo Keller and Julien Gallico, who have developed a series of striking pictures and a magazine based on the project.
